

Clickthrough Tracking

a successful way to track electronic government documents usage @ Randall Library

Jason Fleming (flemingj@uncw.edu), Elliot Simpson (simpsonj@uncw.edu),
and Beth Thompson (thompsonb@uncw.edu)

At UNCW we developed a way to create a link tracking web application for government document PURLS. By appending an EZproxy address to each PURL, it forces the link to pass through and create a log entry in our system that we have tapped into and made accessible via a web application for easy usage reporting.
